

Mythic Vintages

A unique occasion.

From the beginning, we have always kept a small amount of the most memorable harvests in our cellar, a private collection that we are willing to share just a small part of to enable you to become concelebrants of these jewels of our crown that stand out for their metamorphosis in the bottle and their liveliness through the passing of time.

It is a worthy occasion to get to know firstly the vineyards whence the grapes come that make the wines we are going to taste; to become familiar with the particular properties of the soil, the variety of grape and the conditions that determine its quality.

Next we visit the wine cellar, with our underground caverns impregnated with the history of wine culture, as we enter fully into the nobility of a great wine.

We conclude with the presentation of a great vintage, our Viña Salceda Reserva 2001, matured slowly, cared for and nurtured with the passing of time. It is our Reserva Viña Salceda par excellence, the offspring of the greatest vintage that has given birth to wine with its own unique personality, with fine chromatic intensity, dense and layered. Its mineral notes such as truffle, dry brush and undergrowth are notable. In the nose there are cranberries, blackberries, blackcurrants and plums to delight the senses. Its defining characteristic is its Harmony.
